PROFESSIONAL SUMMARY

Results-driven Full Stack and React Native Developer with hands-on experience building cross-platform mobile applications and web solutions. Proficient in JavaScript, TypeScript, React Native, React.js, Node.js, and cloud services including Firebase and Supabase. Proven track record of delivering production-grade apps across real estate, fintech, and EdTech domains. Adept at collaborating with cross-functional teams, integrating RESTful APIs, and implementing scalable front-end architectures. Passionate about clean code, performance optimization, and continuous learning.

WORK EXPERIENCE

React Native Developer

04/2025 – Present | Islamabad, Pakistan

Codify Pvt. Ltd.

Project 1: Aqark Syria | Real Estate Platform (Saudi Market)

- Architected and developed a full-featured real estate mobile application for Saudi users, enabling property search, listing browsing, filtering by location/price/type, and direct agent contact.
- Implemented advanced search and map-based property discovery using React Native Maps, improving property location accuracy and user engagement.
- Built multilingual support (Arabic/English) with RTL layout handling to meet Saudi market requirements.
- Integrated REST APIs for real-time property listings, user authentication, and push notifications ensuring seamless cross-device performance.
- Optimized app performance through lazy loading, memoization, and efficient state management using Redux.

Project 2: Hysab Kytap | Expense Tracker App

- Developed a comprehensive personal finance and expense tracking application with real-time balance monitoring, categorized spending analytics, and budget goal setting.
- Implemented a Travel Mode feature that automatically converts and tracks expenses in the currency of the user's current country using live exchange rate APIs.
- Designed an intuitive dashboard with data visualizations for monthly and category-wise expense breakdowns.
- Integrated Firebase Firestore for real-time cloud sync of user financial data across multiple devices with offline support.
- Secured user data using Firebase Authentication with email/password and Google Sign-In flows.

Project 3: Academic Mobile Application (Internal Platform)

- Built and optimized responsive user interfaces for an academic mobile application, improving load time across Android and iOS devices.
- Collaborated with backend and QA teams to identify, debug, and resolve front-end issues maintaining cross-device compatibility.
- Gained production-level experience integrating Firebase services and consuming RESTful APIs in a professional environment.

EDUCATION

Bachelor of Science in Software Engineering

2021 – 02/2025 | Islamabad, Pakistan

COMSATS University Islamabad

TECHNICAL SKILLS

Mobile Development: React Native, Expo, React Native CLI, React Navigation, Redux, Redux Toolkit, Context API

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive UI/UX

Backend & APIs: Node.js, Express.js, REST APIs, Firebase Cloud Functions, Supabase Edge Functions

Databases & Cloud: Firebase (Firestore, Auth, Storage, FCM), Supabase, MongoDB, PostgreSQL (basic)

DevOps & Tools: Git, GitHub, Docker, Postman, Figma, Android Studio, Xcode, VS Code

Additional: Python, Agile/Scrum, Cross-Platform Development, App Store / Play Store Deployment

PERSONAL PROJECTS

PlantPal

Plant Care & Community App

- Tech Stack: React Native, Firebase, ML Plant Identification API
- Built an AI-powered plant care app with plant identification and plant disease detection from photos using a machine learning API.
- Developed a community hub enabling plant enthusiasts to post content, chat in real time, and connect with like-minded users.
- Integrated a nursery e-commerce store for browsing and purchasing plant care products including disease treatment items, pots, and accessories.
- Delivered seamless UX with intuitive navigation, responsive layouts, and smooth onboarding flows.
